

IMPORTANT! Please read all instructions before installing.

Thank you for purchasing a Shakespeare antenna product. Shakespeare works hard to build reliability and durability into all of its products for maximum customer satisfaction.

The 4351 is a one-piece AM/FM antenna of 3' overall length with cable. The antenna has a 1" 14-thread ferrule for mounting (mounts sold separately).

INSTALLATION INSTRUCTIONS

Choose a mounting location that is as free as possible from obstructions, as far as possible from other antennas and sources of RF, and within reach of the supplied cable. Do not cut the cable.

1. Mount the antenna using a Shakespeare 4186-U or 495-B Lift N Lay mount (mounts sold separately). Follow the instructions included with the mount you choose. The antenna can be mounted self-supporting using the recommended mounts.
2. Route the cable to your AM/FM radio. This antenna does not require an external grounding system, and works equally well on fiberglass, wood, or metal boats.

CLEANING INSTRUCTIONS

To clean the antenna, use mild dishwashing liquid (one that is not harsh to the hands and without ammonia) in lukewarm water. Do not let fuels or solvents come in contact with the antenna.

WARNING: Do not let paint solvents, cleaning solvents or adhesive caulking come in contact with the antenna. Chemicals in these materials might destroy the finish.

SUPPLIED PARTS:

- 1 Antenna assembly

TECH TIP: This antenna will read "open circuit" when tested with an ohm meter or continuity tester.
