

IMPORTANT! Please read all instructions before installing.

Thank you for purchasing a Shakespeare antenna product. Shakespeare works hard to build reliability and durability into all of its products for maximum customer satisfaction.

The 476 is a one-section, phased 1/2-wave collinear array, commercial VHF antenna of 18' length. It is most mountable using the 23/4" x 26" long aluminum sleeve (supplied), which can be strapped directly to a mast - or use Shakespeare's 483 Clamp set (not supplied).

INSTALLATION INSTRUCTIONS

Choose a mounting location that is as free as possible from obstructions.

For mounting to a mast, use the aluminum sleeve (supplied) and suitable hardware (not supplied) to strap the sleeve to the mast. Mast mounting is also possible using Shakespeare 483 Clamp set (not supplied) to attach the sleeve to the mast.

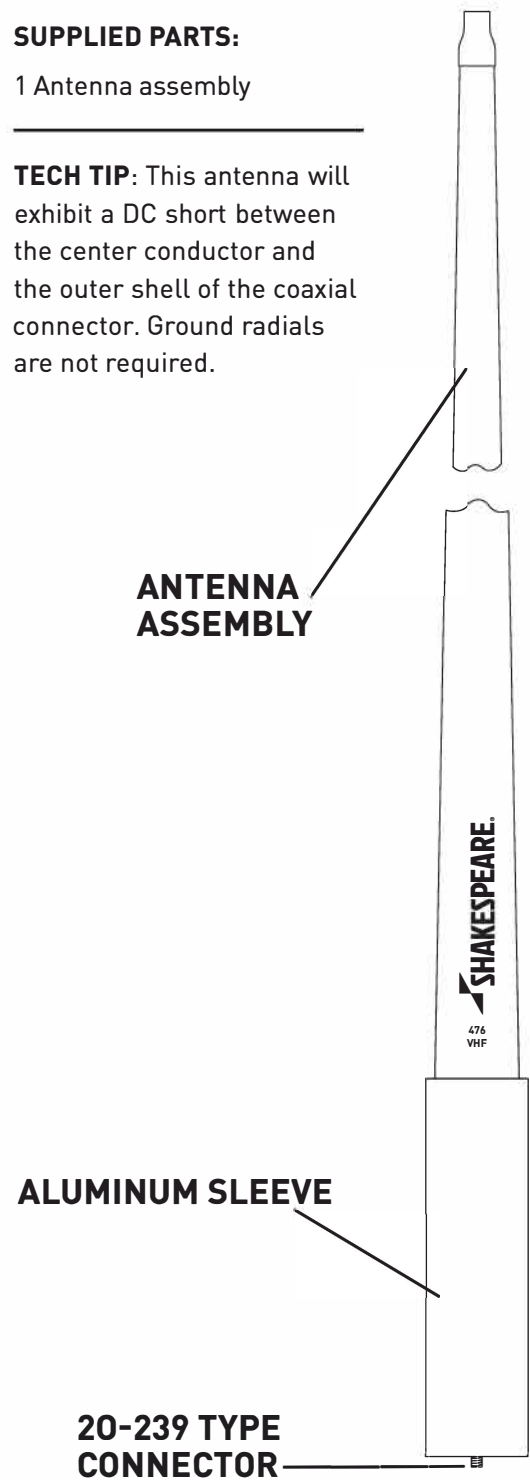

Mount the antenna to the mast or bulkhead, and route the cable to your radio.

IMPORTANT: Do not mount or store this antenna outdoors in an inverted position. Always position the antenna so moisture absorption or condensation can drain out between the aluminum sleeve and the coaxial connection.

SUPPLIED PARTS:

1 Antenna assembly

TECH TIP: This antenna will exhibit a DC short between the center conductor and the outer shell of the coaxial connector. Ground radials are not required.
