

**IMPORTANT! Please read all instructions before installing.**

Thank you for purchasing a Shakespeare antenna product. Shakespeare works hard to build reliability and durability into all of its products for maximum customer satisfaction.

The 5120 is Classic Series, an AM/FM antenna of 8' overall length with a chrome plated brass ferrule and 15' cable with Motorola type plug attachment.

**INSTALLATION INSTRUCTIONS**

Choose a mounting location that is as free as possible from obstructions.

Mount the antenna using a Shakespeare 4187 or 5187 ratchet mount. Follow the directions included with the mount you choose.

**DO NOT CUT THE CABLE.** Route the cable to your AM/FM receiver and plug the Motorola type plug into the antenna jack. Coil any excess cable in an out-of-the-way place. The cable can be lengthened with a 4352 AM/FM 10' extension cable kit (optional).

**CLEANING INSTRUCTIONS**

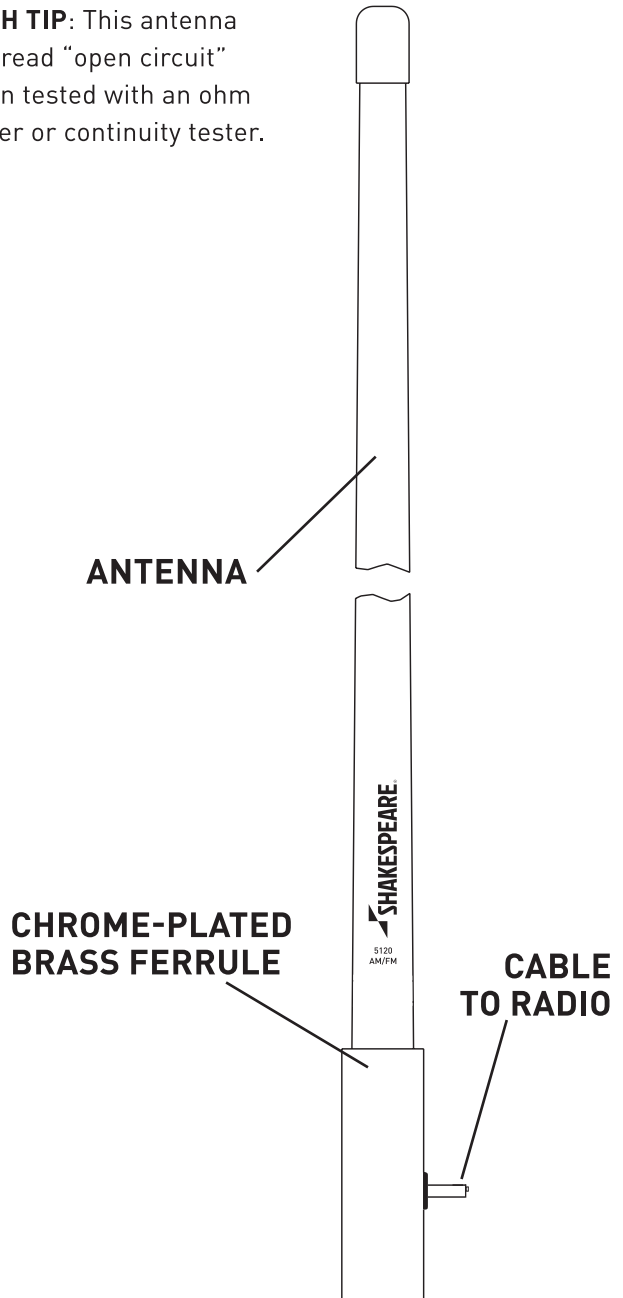

To clean the antenna, use mild dishwashing liquid (one that is not harsh to the hands and *without* ammonia) in lukewarm water.

**WARNING:** Do not let paint solvents, cleaning solvents or adhesive caulking come in contact with the antenna. Chemicals in these materials might destroy the finish.

**SUPPLIED PARTS:**

1 Antenna assembly

**TECH TIP:** This antenna will read "open circuit" when tested with an ohm meter or continuity tester.
